

A **User** does not need to be logged in (authenticated) to be able to participate in a Game. To allow for reasonable statistics, a unique ID is generated for the session of this unauthenticated user.

An **organization_admin** can change the roles of other registered users.

A **scenario_designer** can create, edit and delete scenarios.

A **trainer** can control a game and view statistics.

A **learner** can view statistics and replays of their previously played games.
