Conduct scenario-based training

Cybersecurity Awareness Training

Facilitator

- Training has started
- Give introduction
- Give instructions on how to participate
- Start scenario instance
- Received answer from every participant
- Show results
- Explain correct answer
- Last inject answered?
- No
- Conclude training
- Training completed

Participant

- Inject received
- Read inject
- Take a decision
- View results

Note: the list of requirements provided by the AIT also mentioned "stories", but did not specify how they different from a list of injects.

Note: "static" injects have been omitted from this diagram for the sake of simplicity and readability.
